

CLASSIC MICRONES

India's Leading
Manufacturer of Imported

COATED & UNCOATED
**CALCIUM
CARBONATE**

CLASSIC MICRONES

• CALCIUM CARBONATE

• DOLOMITE

• BENTONITE

Calcium Carbonate / Dolomite / Bentonite Powder

All our powder grades are produced using premium-quality stone lumps sourced from an extensive network of mines across India, Vietnam, and Egypt, ensuring consistent purity, controlled particle size distribution, and superior performance across applications.

APPLICATION

Paper Industry - Used as fillers and functional additives to improve brightness, opacity, smoothness, retention, and drainage. Helps reduce fiber cost and enhances sheet formation and printability.

Paint Industry - Works as extenders and rheology modifiers to improve opacity, coverage, suspension stability, and durability. Enhances film strength, gloss control, and reduces overall formulation cost.

Plastic / PVC / Rubber - Acts as fillers to improve stiffness, dimensional stability, mechanical strength, and processing flow. Supports better dispersion, reduces compound cost, and enhances impact and thermal performance.

Other Industrial Uses - Applied in ceramics, adhesives, construction chemicals, detergents, drilling, and metallurgy. Used for pH control, binding, reinforcement, and as performance-enhancing mineral additives.

ABOUT US

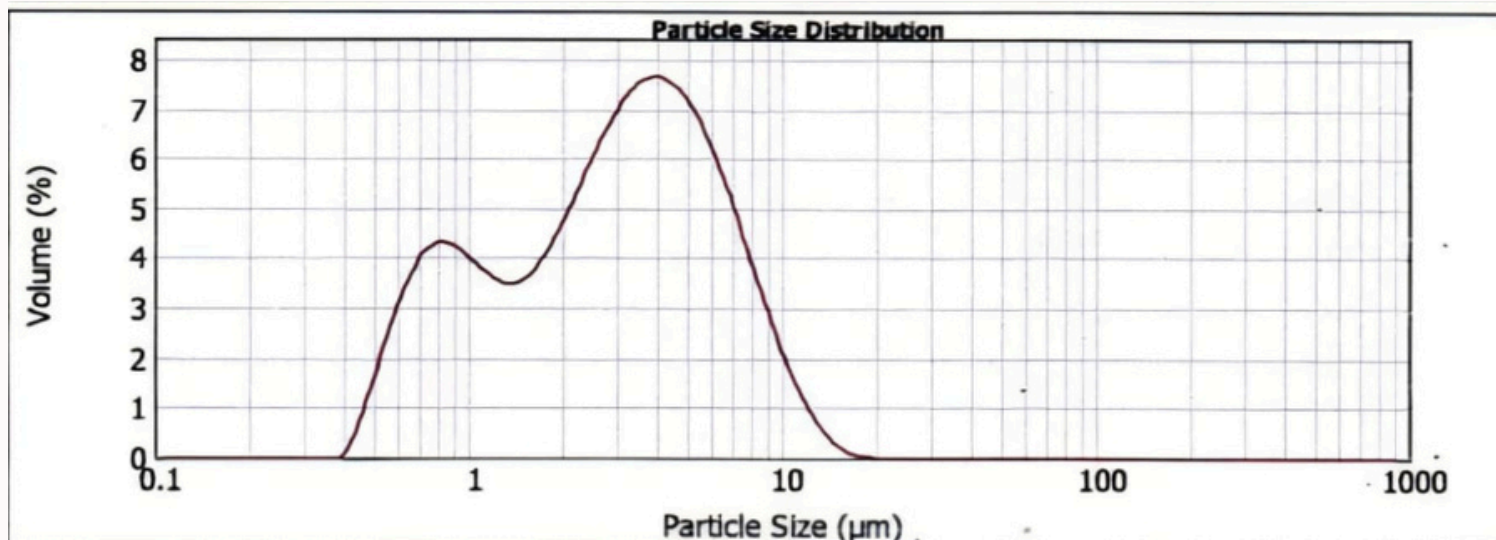

Classic Micrones is a specialized manufacturer of high-purity mineral powders, delivering consistent quality and performance to industries such as paper, paint, plastics, PVC, rubber, and construction materials.

With a strong sourcing network across India, Vietnam, and Egypt, we procure premium-grade stone lumps that form the foundation of our high-whiteness, chemically stable, and precisely classified CaCO_3 products. Our production system is supported by stringent quality controls, advanced grinding technology, and standardized testing, ensuring every batch meets global industrial specifications.

We are committed to supplying dependable raw materials that enhance process efficiency, product strength, and end-use value for our customers across domestic and international markets.

PRODUCT	CALCIUM CARBONATE - GCC
Rates in INR Per Tonne	3500 - 14000
Particle Size	20 Microns To 2 Microns
State	Powder
Abrasion loss 174000 revs	1.31 - 5.90 mg/cm2
Whiteness	92-99%
Brightness	93% Min
Purity	75% / 85% / 98%
Calcium Carbonate as CaCo3	70% - 98%
Silica as SiO2	0.5 - 3.5%
Magnesium Carbonate as MgCo3	0.4% - 3%
Alumunium Oxide as Al2O3	0.1-0.5
Sodium Oxide as Na2O	< 0.05
Sulphate as SO4	0.02 % Max
Chloride as Cl	Traces
Iron (Fe)	< 100 ppm
Calcium oxide as CaO	1.5% to 2.5%
Magnesium Oxide as MgO	0.5% to 2.5%
CaCl2	0.6 to 0.8
Appearance/Color	White
IUPAC Name	Calcium carbonate
Other Name	Calcite
Molecular Formula	CaCO3
Grade Standard	Industrial Grade
pH Value	8.5 to 8.8
Refractive index	1.59
Specific Gravity	2.5 - 2.7
Melting Point	1,339 C
Loss on ignition	43% - 44%

PARTICLE SIZE DISTRIBUTION

D(0.10) : 0.77 μm

D(0.50) : 2.99 μm

D(0.90) : 7.26 μm

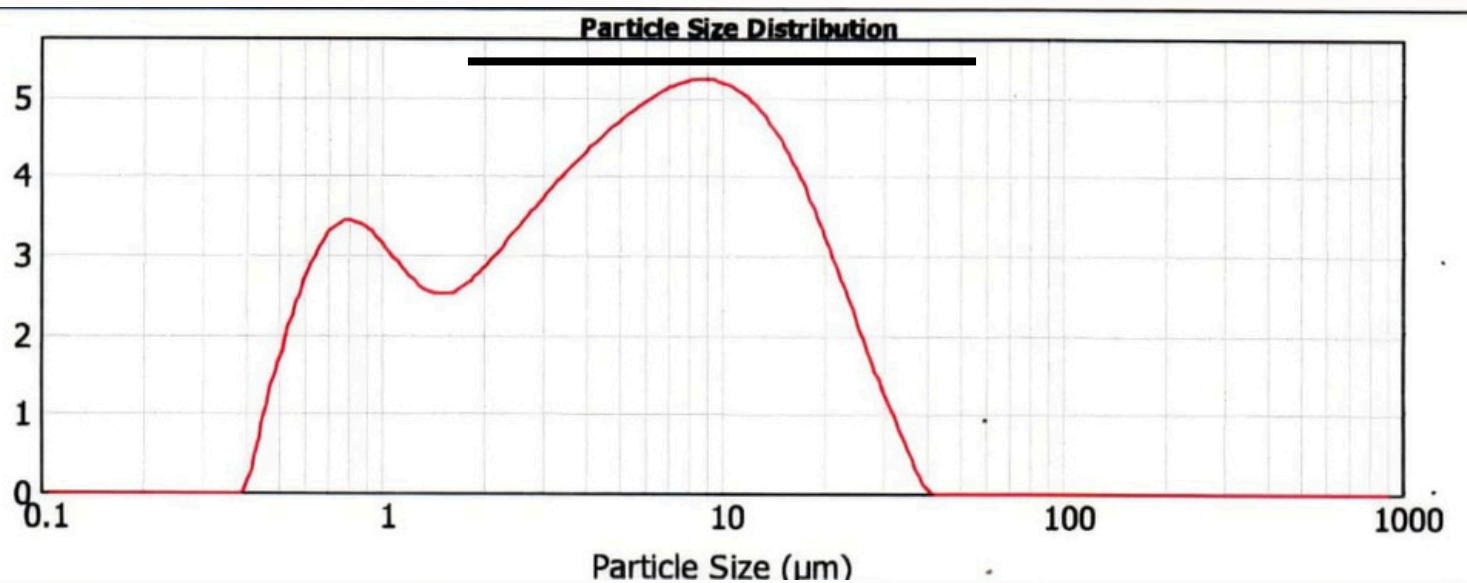

D(0.95) : 8.82 μm

D(0.97) : 9.89 μm

D(0.98) : 10.70 μm

D(0.99) : 11.97 μm

D(1.00) : 17.88 μm
